*inside beautiful...*

*American Down & Feather:  
designed to deliver.*

A second generation family business that are experts in custom manufacturing of high quality products for the Interior Design, Sleep, Hospitality, Upholstery and Workroom industries. With over 20 years of experience, you can count on us for the finest in pillows, cut foam, comforters, bed toppers, fills, bulk materials and more. Plus, most importantly, a great vendor relationship designed to deliver. All our products are Made in the U.S.A. at our facility in Henderson, Colorado.

## WHY AMERICAN DOWN & FEATHER?

- Offering the best in personalized service is one of the top reasons our customers keep coming back.
- We work directly with interior designers and industry professionals but can also drop ship to your clients.
- We specialize in Custom and Standard Cushions, Comforters, Throw Pillows, Sleep Pillows, Mattress Toppers, Cut Foam and more.
- Choose from diverse types of fill and blends including, organic and allergy resistant materials, Polyester, Polysilk™ and Kapok.
- We offer designer quality down and 2-4 centimeter feathers sourced primarily in the USA; ethically harvested and often cleansed as many as 7x's. No crunchy or chopped feathers.

*"Great product, great price, and prompt shipping! You can be sure you will have my business in the future"*

**-Sam Stubbs**

## ABOUT OUR FIBERS & FILLS

**Down:** We use cleansed and sanitized goose and duck down. Our down is triple washed, ethically harvested, and then sanitized at our factory. We tumble it for several hours to produce a lovely mixture of soft and lofty fill. Ideal for high quality bedding and decorative purposes.

**Soft Feather:** We use only small soft feathers. The feathers are ethically harvested, washed, steam cleaned, and sanitized at our factory. These feathers have a nice curl, small quills, and a small percentage of down-like quality fibers. Ideal for throw pillows and seat cushions.

*"The down alternative is great quality. I will use these for the pillows I design from now on"*

**-Nancy Kallile**

**Fiber:** We process our fiber fills in the factory to produce an exceptionally light and "lofty" feel. Our fiber filled pillows feel smooth and soft and evenly filled.

**Blended Down** is a combination of soft feather and fiber. It is a soft and economical choice.

**Polysilk™** is a luxurious down alternative fill. It is a polyester microfiber that has a soft and silky feel. Polysilk™ is machine washable, hypoallergenic and long lasting.

**Our Foam** is of superior quality used for sleeping pillows to Cushion inserts and ecologically compliant. Urethane, Qualux™, Latex and Memory foam cut to size. Only pay for what is cut...no waste!

**Toll Free: 1.866.601.3696**

- We use 230 thread count for all our down proof ticking and products vs. more widely used 180 thread count.
- We offer upholstery supplies and bulk materials at wholesale prices.
- No minimum order quantities are required; 5 day turnaround on most orders.
- Our products are featured inside beautiful homes, lodges, hotels and B&B's throughout Colorado and the USA.

**No minimum order quantities are required!**

## Down & Feather Blends:

Custom blended by weight and tumbled for hours to ensure a uniform mix and exceptional loft.

10% down and 90% soft feather is ideal for throw pillows, seat cushions and backs. This blend makes for beautiful decorative duvet inserts.

25% down and 75% soft feather is ideal for high quality throw pillows, seat cushions and backs, as well as envelopes.

This blend makes higher loft decorative duvet inserts.

50% down and 50% soft feather is well suited for sleep products such as pillows, duvet inserts, feather beds, and mattress toppers.

80% down and 20% soft feather is ideal for luxurious sleep products including pillows, duvet inserts, feather beds, and mattress toppers.

*"You made my day, no make that, week!"*

**-Susan, Home on the Range**

**Kapok Fiber** is a cool and durable fiber with a soft and supportive feel and its sustainably harvested. It can be used as a down alternative fiber. It is softer and lighter than down, very buoyant, resilient, and resistant to water and mildew. Kapok is naturally hypoallergenic, antimicrobial, and resistant to mites. We process this fiber by tumbling it to create an exceptionally lofty feel.

**Polyester Fiber** is a functional and durable fiber that has a firm and supportive feel, another down alternative. It is hypoallergenic, washable, and resists mildew.

**Green Fiber** is made from recycled plastic beverage bottles. Down Alternative. Hypoallergenic. Resists Mildew.
